Your right is for action alone, never for the results. Do not become the agent of the results of action.

ABOUT US

Krishna Construction Co. (KCC) was founded in 2002 with a clear and focused vision: to deliver dependable, high-quality solutions across residential, commercial, and infrastructure development. Beginning its journey with real estate projects in South Gujarat, the company laid a strong foundation built on technical competence, disciplined execution, and long-term thinking. From the outset, KCC positioned itself not just as a contractor, but as a partner committed to creating lasting value through well-planned and well-executed projects.

Over the years, KCC has steadily evolved into a trusted name in the infrastructure sector. The company has successfully delivered a diverse portfolio of projects that include water distribution networks, RCC roads, underground drainage systems, elevated and underground water tanks, sewage treatment plants (STPs), water treatment plants (WTPs), canal works, and other critical civic infrastructure. Each project reflects KCC's emphasis on engineering precision, adherence to quality standards, and on-time completion, even in complex and challenging environments.

A key strength of Krishna Construction Co. lies in its ability to work closely with public-sector institutions and statutory bodies. The company has partnered with prominent government organizations such as the Ahmedabad Municipal Corporation (AMC), Gujarat Urban Development Company (GUDC), Gujarat Water Supply and Sewerage Board (GWSSB), and multiple Nagar Palikas. These collaborations demonstrate KCC's capability to meet stringent technical specifications, regulatory requirements, and accountability standards expected in public infrastructure projects.

Driven by experienced leadership and supported by a skilled technical and execution team, KCC has expanded its footprint beyond Gujarat into Maharashtra, Madhya Pradesh, Rajasthan, and Karnataka. This geographic growth reflects the company's adaptability, operational strength, and growing reputation as a reliable infrastructure development partner. As it continues to scale, Krishna Construction Co. remains committed to building infrastructure that supports sustainable urban growth and improves everyday life across regions.

OUR JOURNEY

Founded by Mr. Kunvarjibhai H. Kevadia in 2002, KCC was built on the values of hard work, dedication, and quality. Mr. Kevadia's deep understanding of construction and strong focus on underground drainage works helped establish KCC as a reliable and result-driven company.

In 2014, the next generation joined the mission. Mr. Siddharthbhai K. Kevadia and Mr. Mayurbhai B. Kevadiya brought fresh energy and innovation, setting new milestones and strengthening KCC's position in the infrastructure industry.

MISSION & VISION

To deliver top-quality construction and infrastructure services with a focus on safety, innovation, and timely execution. We aim to meet and exceed client expectations through professional project management and technical excellence.

To be the preferred infrastructure company for public and private sector clients across India, known for integrity, commitment, and quality.

CORE SERVICES

Our scope of work includes the planning and execution of Sewerage, Water, and Effluent Treatment Plants (STPs, WTPs, and ETPs), water supply schemes, underground drainage networks, and overhead and underground water storage systems. We deliver water distribution stations, sewage pumping stations, canal and hydraulic works, RCC roads, paver block works, lake development and rejuvenation projects, as well as residential, commercial, and public building works, providing integrated infrastructure solutions focused on quality, durability, and long-term performance.

OUR REACH

We have successfully delivered projects across multiple regions in India, including all regions of Gujarat as well as Maharashtra, Madhya Pradesh, Karnataka, and Rajasthan. This wide geographic footprint reflects our strong execution capabilities, adaptability to varied site conditions, and ability to comply with diverse regulatory frameworks. By consistently delivering projects in both urban and semi-urban contexts, we have built a reputation for reliability, technical competence, and efficient on-ground coordination across states.

OUR PROJECTS

Sewage Treatment Plant (STP) Projects

- 22.00 MLD STP at Vapi
- 12.90 MLD STP at Dhoraji
- 11.90 MLD STP at Una
- 7.40 MLD STP at Dwarka
- 11.30 MLD STP at Bardoli
- 8.30 MLD STP at Jasdan
- 4.80 MLD STP at Tharad
- 7.00 MLD STP at Gariyashar
- 6.20 MLD STP at Salaya
- 5.50 MLD STP at Bhachau

Water Treatment Plant (WTP) Projects

- 36.08 MLD WTP at Modasa, District Aravalli
-

OUR PROJECTS

Water Supply Projects

- Water Supply Schemes at Babra, Kheda (Package-II & Package-III), and Rajpipla NNS-I
- Water Supply Project at Dhari (GWSSB)
- Okha Mandal Water Supply Project (GWSSB)

TURNOVER

This illustrates KCC's strong and consistent growth over the years, reflecting the company's steady transition from a regional contractor to a large-scale infrastructure development firm. Starting with a turnover of ₹1.94 crore in 2006–07, the upward trend becomes more pronounced after 2012–13, followed by a sharp acceleration in recent years. The significant rise from ₹92.61 crore in 2021–22 to ₹497.37 crore in 2024–25 highlights KCC's expanding project portfolio, enhanced execution capabilities, and growing trust from government authorities. This sustained increase underscores the company's financial strength, scalability, and long-term growth momentum.
